ABOUT ME

Senior Network Engineer | CCIE #69742 | IP/MPLS & Service Provider Networks

EDUCATION AND TRAINING

Cisco Certified Internetwork Expert — CCIE #69742

Cisco

City: Brussels | **Country:** Belgium

Cisco Certified Network Professional — CCNP Enterprise

Cisco

Country: Portugal

Cisco Certified Network Associate — CCNA

Cisco

Country: Portugal

Network Engineering

Faculdade INFNET [2022/01/15 – 2023/11/30]

City: Rio de Janeiro | **Country:** Brazil | **Website:** https://www.infnet.edu.br

Information Technology Management

Faculdade Estácio de Sá [2016/10/04 – 2018/12/16]

City: Cabo Frio | **Country:** Brazil | **Level in EQF:** EQF level 6

WORK EXPERIENCE

dstelecom – Braga, Portugal

Network Engineer

[2023/06/19 – Current]

• Design, operate, optimize, and troubleshoot large-scale IP/MPLS backbone and aggregation networks in a multi-operator telecommunications environment.

• Engineer routing and transport infrastructures using BGP, OSPF, MPLS LDP, RSVP-TE, MPLS Traffic Engineering, BFD, and explicit-path engineering.

• Deploy, maintain, and troubleshoot Layer 2 VPN services, including VPLS, VPWS, Pseudowires, and EVPN/MPLS, supporting residential, enterprise, and wholesale telecommunications services.

• Design resilient network architectures using MPLS-TE hot-standby tunnels, pseudowire protection, MC-LAG/MLACP, Ethernet multi-homing, and redundancy mechanisms.

• Perform advanced troubleshooting across routing, MPLS, L2VPN, VLAN/QinQ, QoS, multicast, DHCP/IPoE, FTTH, and broadband service delivery.

• Conduct large-scale configuration and architecture audits across multi-vendor carrier-grade platforms, including ZTE, Nokia, Huawei, and MikroTik, identifying service-impacting risks and improving network reliability, scalability, and operational efficiency.

UPEI IT – Cabo Frio, Brazil

Network Engineer / IT Consultant / Founder

[2019/11/14 – 2023/04/20]

• Provided network engineering and IT infrastructure consulting services to multiple clients, covering network design, implementation, administration, optimization, and troubleshooting.

• Designed and implemented scalable, reliable, and secure network infrastructures tailored to business requirements and operational needs.

• Configured, maintained, and troubleshot routing, switching, VLANs, and network connectivity across multi-vendor environments.

• Conducted network assessments, diagnosed complex infrastructure issues, and provided technical recommendations to improve network performance, reliability, and operational efficiency.

GTEC - GerenciaTec – Rio das Ostras, Brazil

Network Engineer

[2018/08/09 – 2019/11/04]

• Managed and maintained core telecommunications network infrastructures for multiple Internet Service Providers (ISPs) in the Rio de Janeiro region.

• Configured and optimized BGP and OSPF routing infrastructures, supporting routing policies, network redundancy, and efficient traffic flow.

• Performed troubleshooting of routing, network connectivity, and performance issues to maintain service availability and operational stability.

• Administered critical network equipment and server infrastructure, supporting reliable telecommunications service delivery and network operations.

UltraIP Telecom – Cabo Frio, Brazil

Senior Information Technology Analyst

[2017/02/03 – 2018/01/11]

• Led IT operations and managed the company's network and server infrastructure, including FTTH and UTP networks, ensuring service availability and operational reliability.

• Designed, configured, and maintained eBGP and iBGP routing infrastructures, implementing routing policies and redundancy mechanisms to optimize network traffic.

• Administered multi-platform server environments, including FreeBSD, Ubuntu Linux, and Windows Server, supporting critical infrastructure services.

• Managed multi-vendor networking and monitoring solutions, including MikroTik, FiberHome, Cisco, Cacti, PRTG, and Asterisk, supporting network operations, performance monitoring, and IP telephony services.

Mar Telecom – Cabo Frio, Brazil

Network Telecommunications Administrator

[2013/10/08 – 2016/11/23]

• Managed and maintained telecommunications infrastructure comprising 45 transmission towers, supporting network stability, availability, and reliable service delivery.

• Administered LAN/WAN routing infrastructures using BGP and OSPF, supporting network connectivity, routing efficiency, and redundancy.

• Designed and implemented disaster recovery and business continuity procedures to improve network resilience and minimize service disruptions.

• Administered Linux servers and infrastructure services, including FreeRADIUS, MySQL, and PostgreSQL, and deployed monitoring solutions using Icinga and Cacti, while providing Level 2 technical support for enterprise customers.

West Internet – Cabo Frio, Brazil

Network Operations Center Analyst

[2012/05/13 – 2013/10/03]

• Coordinated technical support teams and service order workflows, ensuring efficient incident handling and compliance with Service Level Agreements (SLAs).

• Implemented and managed telecommunications network monitoring processes, supporting service availability, proactive fault detection, and rapid incident response.

• Optimized operational procedures and technical support activities to improve incident resolution efficiency, service quality, and network reliability.

GTV – Rio de Janeiro, Brazil

Technical Supervisor

[2011/01/03 – 2011/10/30]

Outsourced service provider supporting GVT telecommunications operations.

• Led and supervised technical installation teams responsible for deploying VoIP services for corporate customers, ensuring installation quality and successful service delivery.

• Managed technical relationships with enterprise customers, coordinating installation activities, service requirements, and contractual responsibilities.

LANGUAGE SKILLS

Mother tongue(s): Portuguese

Other language(s):

English

LISTENING B1 **READING** B2 **WRITING** B1

SPOKEN PRODUCTION A2 **SPOKEN INTERACTION** A2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

TECHNICAL SKILLS

Technical Skills

Routing & Service Provider Networks

BGP, OSPF, MPLS, MPLS LDP, RSVP-TE, MPLS Traffic Engineering, BFD, IPv4, IPv6

Layer 2 & VPN Technologies

Ethernet, VLAN, IEEE 802.1Q, QinQ, VPLS, VPWS, Pseudowires, EVPN/MPLS

High Availability & Resilience

MPLS-TE explicit paths, hot-standby tunnels, pseudowire protection, MC-LAG, MLACP, Ethernet Segment

Broadband & Access Networks

DHCP, PPPoE, subscriber access, QoS

QoS & Traffic Engineering

802.1p/PCP, CoS, traffic classification, CIR/PIR, service prioritization, bandwidth management

Network Vendors & Platforms

ZTE, Nokia, Huawei, Cisco, MikroTik, FiberHome

Network Monitoring & Infrastructure

Zabbix, Nagios, Icinga, Cacti, The Dude

Linux & Network Services

Linux, FreeRADIUS, DNS, MySQL, PostgreSQL, Proxmox

Network Automation & Assurance

Network configuration auditing, service-path analysis,
configuration validation, network troubleshooting automation,
Python, SNMP, SSH

ORGANIZATIONAL SKILLS

Organizational Skills

• Strong experience coordinating technical and operational teams.

• Proven leadership experience in NOC and telecommunications environments.

• Ability to prioritize incidents, technical projects, and operational activities in mission-critical network environments.

• Strong analytical and problem-solving skills.

COMMUNICATION SKILLS

Communication Skills

• Strong communication skills developed through technical leadership, customer-facing consulting, NOC supervision, and cross-functional collaboration.

• Ability to communicate complex technical issues clearly to engineering teams, operations teams, customers, and stakeholders.
